MOHAMED SASAN

Full-Stack Developer | React.js · Next.js · Node.js · MongoDB · REST APIs

mohamedsasan006@gmail.com | +94 78 209 2575 | Jaffna, Sri Lanka | github.com/mohamedsasan | linkedin.com/in/mohamedsasan

PROFESSIONAL SUMMARY

Final-year Information & Communication Technology undergraduate with proven hands-on experience delivering full-stack web and mobile applications end-to-end. Proficient in React.js, Next.js, Node.js, Express.js, and MongoDB with practical expertise in REST API design, JWT authentication, real-time WebSocket systems, and cloud deployment. Demonstrated ability to ship complete, user-facing features independently — from database schema to responsive UI. Passionate about clean code, scalable architecture, and building products that solve real problems.

TECHNICAL SKILLS

Frontend	React.js, Next.js, React Native, JavaScript (ES6+), TypeScript, Tailwind CSS, HTML5, CSS3
Backend	Node.js, Express.js, REST API Design, PHP, Java, Python
Databases	MongoDB, MySQL, Firebase Realtime DB, Local Storage
Auth & RT	JWT, Session Auth, WebSockets (Socket.io), Live Collaboration, Streaming
UI/UX	Figma, FigJam, Canva, Responsive Design
Dev Tools	Git, GitHub, VS Code, Postman, Google Colab
Cloud	Microsoft Azure (Certified), Firebase, WordPress

PROJECTS

Collaborative Code Editor — Real-Time Web Application *2024*

github.com/mohamedsasan/collabwrite---updated | React.js · Node.js · Express.js · MongoDB · WebSockets

- Engineered a real-time multi-user code editor supporting simultaneous editing via WebSocket (Socket.io), reducing collaboration friction and eliminating the need for manual code-sharing workflows.
- Architected a RESTful backend with Node.js and Express.js, implementing JWT-based authentication and stateless session management for secure multi-user access.
- Integrated an LLM API to deliver AI-powered code continuation, boosting coding efficiency for collaborating users by surfacing contextual suggestions in real time.
- Designed and managed a MongoDB data layer for persistent user sessions and document storage, and built a responsive React.js frontend with live chat for seamless in-editor communication.

E-Voting System — Secure Online Voting Platform *2024*

github.com/mohamedsasan/e-voting-system | HTML · CSS · JavaScript · PHP · MySQL

- Developed an end-to-end web-based e-voting platform covering voter registration, identity verification, ballot casting, and automated result tallying - ensuring zero manual intervention in the vote-counting process.
- Built a secure PHP backend with parameterized MySQL queries to prevent SQL injection, safeguarding voter data integrity across all voting operations.
- Delivered a fully functional admin management panel supporting candidate management, voter list administration, and real-time result generation.

Smart Diary — Personal Productivity Web Application *2024*

github.com/mohamedsasan/Smart_Diary | HTML · CSS · JavaScript · Firebase

- Built a feature-complete diary application with mood tracking, daily journaling, calendar timeline visualisation, and push notification reminders - increasing user journaling consistency.
- Integrated Firebase Realtime Database for instant data persistence across devices, enabling cross-platform access without page reloads.
- Designed a responsive, intuitive dashboard UI compatible with mobile and desktop, applying UX research principles from Figma prototypes to production code.

TRAINING & PRACTICAL EXPERIENCE

Full-Stack Developer — MERN Stack Training Program *Jun 2024*

NoviTech R&D Pvt Ltd

- Delivered a production-ready social media clone application using the full MERN stack (MongoDB, Express.js, React.js, Node.js), covering user authentication, post CRUD operations, and a real-time feed.
- Gained end-to-end development experience: designed database schemas, built RESTful API routes, and implemented interactive React components with state management.
- Practiced component-based UI architecture and agile iteration, receiving code review feedback from senior developers at a professional R&D firm.

EDUCATION

Bachelor of Information & Communication Technology (Hons) *Aug 2022 – Present*

Rajarata University of Sri Lanka | Current GPA: 3.12 / 4.00

- Core modules: Software Engineering, Web Technologies, Databases, OOP, Networking, System Design.

Diploma in Software Engineering *Dec 2025*

ESOFT Metro Campus

- Covered responsive web design principles, structured layouts with HTML & CSS, and software development lifecycle.

CERTIFICATIONS

- AI Fundamentals — IBM SkillsBuild & Cisco Networking Academy (2025): Machine learning, NLP, AI ethics.
- Introduction to Microsoft Azure — Microsoft Learn Student Ambassadors Sri Lanka (2024): Cloud fundamentals.
- MERN Stack Development — NoviTech R&D Pvt Ltd (2024): Full-stack project delivery.
- Web Design for Beginners — University of Moratuwa (2024): HTML, CSS, responsive design.
- Build a Free Website with WordPress — Coursera Project Network (2024).
- IX'25 Concept Design Challenge — IEEE Student Branch, IIT (2025): Technology design competition.

LEADERSHIP & COMMUNITY

- General Secretary, Muslim Majlis — Rajarata University of Sri Lanka (2025–2026): Managed 200+ member student organization, coordinating events, meetings, and communications.

- Volunteer Instructor — Genesis Academy, Jaffna (2025–Present): Teaching programming and IT fundamentals to students.
- STEM Education Volunteer — STEMUP Educational Foundation (2025–Present).
- Public Relations Team Member — Rotaract Club, Rajarata University (2025–Present).
